

The Berry Man, Inc.

“Local, Organic and Sustainable Program”

In our continuing effort to be a responsible neighbor and improve on our sustainability program we have created the “Local, Organic and Sustainable Program”

Our customers including schools, hospitals, retirement communities and even local chefs can purchase fresh local, organic, and sustainable products right from our truck.

Each Day we source fresh products from local farms to bring to people in our community. Our truck is Environmentally friendly. By using both Bio-Diesel and solar power we hope to spread the word that every little bit helps and everyone can do something.
